

Artisanal Sourdough Bread & Mediterranean Pasta Recipe Guide

Ingredients for Classic Sourdough: 500g unbleached bread flour, 350g lukewarm water (70% hydration), 100g active sourdough starter, 10g fine sea salt.

Instructions: In a large glass mixing bowl, combine the water and sourdough starter until completely dissolved. Gradually incorporate the flour until a shaggy dough forms. Allow the dough to rest for 45 minutes during the autolyse phase.

Stretch and Fold Technique: Every 30 minutes for the next 2 hours, perform a series of gentle stretches and folds to develop the gluten network. Transfer the shaped loaf to a proofing basket and ferment overnight in the refrigerator at 4 degrees Celsius.

Baking: Preheat a cast-iron Dutch oven to 230 degrees Celsius (450 Fahrenheit). Score the top of the chilled loaf with a razor blade, carefully place it into the pot, cover with the lid, and bake for 20 minutes before removing the lid to achieve a golden-brown crispy crust.
